Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Applicant should go through the entire specification and correct the many awkward English phrases. For example, on page 1, "people understand one another oftener..." Also on page 1, the use of the word superposition is awkward. The use throughout the specification of "talking status", "talk holding status" and "waiting status" should be substituted with more standard English phrases like, busy or off-hook, on-hold and standby, on-hook or call waiting. In addition, "opposite party" is also confusing. Is this the calling party? Called party? Customer? Opposite to whom? The master telephone? Slave telephone?

This is not an exhaustive list, but merely examples of the problems that exist with the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2614

Specifically, the terms "talking status", "talk holding status" and waiting status" are confusing and ambiguous. For example, "waiting status" could mean standby, on-hook or call waiting.

In addition, in claim 1, the phrase "and in communication with each of which a line is selected... is incomprehensible.

In claim 3, "releasing the calling-up" is not understood.

This is not an exhaustive list, but merely examples of the problems that exist with the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

As best as can be determined, because of the problems noted above the following rejection appears to be appropriate.

Claim 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,602,910 (Tsutusi et al.).

Note that Tsutsui et al. teach a master telephone 14, a slave telephone 119, a status means (see Col. 3, lines 20 – 33), status discrimination means (at least element 17), incoming call detector (inherent) and notification means (note element 19 and Col. 2, lines 44 – 49).

Art Unit: 2614

What Tsutsui et al. do not explicitly teach is a plurality of extensions, but does teach one (see col. 8, lines 9 – 13). It would have been obvious to one of ordinary skill in the art to have incorporated more than one extension as such would only entail duplicating what is taught by Tsutsui et al.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bill Deane whose telephone number is (571) 272-7484. In addition, facsimile transmissions should be directed to Bill Deane at facsimile number (571) 273-8300.
